OUR TREATMENTS:

Smart LASIK

Most up-to-date vision correction procedure that features some of the most advanced eye machines available (Ziemer - Femto LDV Z8 + Schwind Amaris 1050RS).

Harnessing the advancements of the featured machines, this innovative LASIK procedure, which corrects refractive errors (Hyperopia, Myopia, Astigmatism) to achieve the most accurate and most satisfying results while presenting a 10-year warranty.

Ultra LASIK Advanced

Our gold standard for LASIK surgery. Ultra LASIK is a customized laser treatment which results in high-definition quality vision with faster healing and recovery rate. It is recommended for patients with high eye grades and astigmatism.

Z Prime LASIK Pro

It is usually recommended for those who wish to correct a mild degree of myopia (nearsightedness), hyperopia (farsightedness), or astigmatism.

Corneal Collagen Cross Linking (CXL)

It is usually done in combination with any LASIK procedure to biomechanically strengthen thin corneas for a greater and lasting stability of vision over time.

Thin Flap LASIK (TFL)

This is done in combination with any LASIK procedure for those with high eye grades and thin corneas to conserve corneal tissue.

OTHER VISION CORRECTION PROCEDURES:

✂ **Implantable Contact Lens (ICL)**

✂ **Femtosecond Laser Assisted Cataract Surgery (FLACS)**

✂ **Refractive Lens Exchange (RLE)**

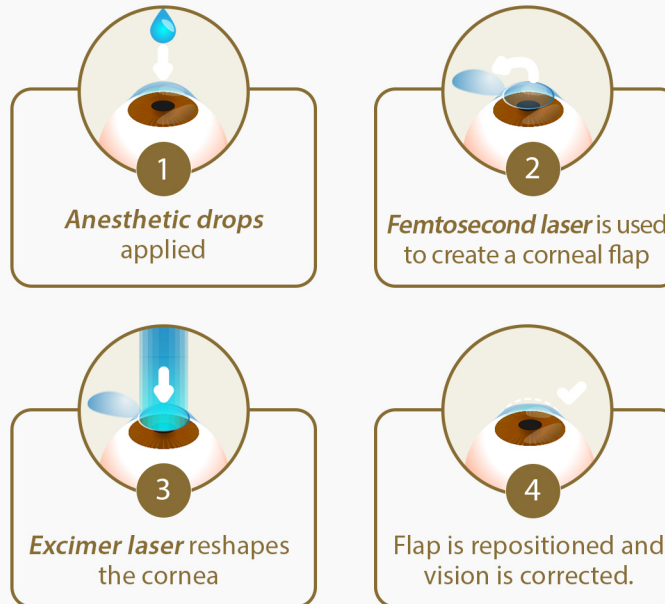

The **SCHWIND AMARIS 1050RS** is the one of the worlds highest-performance eye laser system for refractive and therapeutic corneal surgery, and is only available in Shinagawa Clinic in the Philippines.

The new **Femto LDV Z8** is a state-of-the-art, multipurpose laser platform for refractive, therapeutic and cataract surgeries. This is available only in Shinagawa BGC branch.

To date, this is our most advanced machine yet, delivering outstanding **ULTRA LASIK** results.

LASIK SURGERY PROCEDURE:

FREQUENTLY ASKED QUESTIONS:

What is the minimum age requirement for LASIK?

You need to be at least 18 years of age to have LASIK surgery. This is to make sure that your refractive error - the amount of nearsightedness, farsightedness, and/or astigmatism - you have is stable and unlikely to worsen after your LASIK surgery.

Is it painful?

No. The actual treatment is painless. Anesthetic drops will completely numb your eye. You may just feel a light pressure sensation around your eye. You may also be given a prescription for a pain reliever should you need it.

How long does the LASIK procedure take?

The procedure usually takes around 10 minutes for both eyes. Depending on your prescription and needed correction, the laser itself only takes 20-50 seconds to correct your vision.

How long will the effect of LASIK last?

Generally, the correction is permanent, especially if your eyeglass prescription was stable before you had LASIK. Shinagawa offers a 5-year LASIK warranty should there be any changes in the vision.

Is LASIK safe?

Over a million laser refractive surgeries are performed successfully worldwide each year. It has been proven to have a high safety profile with great results.

At Shinagawa, with its highly trained and experienced team of surgeons and nursing staff, paired with the most advanced technology, each patient can be assured of receiving the best LASIK care.
